Allowable Subject Matter

1. Claims 1-15 are allowed.
2. Since allowable subject matter has been indicated, applicant is encouraged to submit formal drawings in response to this Office Action. The early submission of formal drawings will permit the Office to review the drawings for acceptability and to resolve any informalities remaining therein before the application is passed to issue. This will avoid possible delays in the issue process.
3. The following is an examiner's statement of reasons for allowance. None of the prior art of record either individually or in combination teach the following:

- an emulation module and an application both interfacing directly with an operating system of the development system.

The present invention discloses a method and system for allowing testing of an application for point-of-sale (POS) equipment to facilitate development of the application. Here, an emulation module is used corresponding to the specialized devices that can be used to emulate, on the development system, the interaction between the application and the devices that will occur when the application is later executed on the POS equipment, and in this case, the emulation module and the application both interface directly with the operating system of the development system. The allowable feature providing an emulation module and an application both interfacing directly with an operating system of the development system is not disclosed by any

prior art reference. The closest prior art, Binkley (US 5,088,033) discloses a host system having a host processor and an emulating processor that executes sequences of instructions the same as a central processor of the target system, while the host processor provides emulations of input and output signals corresponding to the I/O devices of the target system. In Binkley, the I/O devices are emulated by the host system using a separate processor that has a specialized operating system which performs only I/O operations, and an application of the target system executed on the emulating processor would interface with the operating system of the emulating processor, while the emulation module that emulates the I/O devices of the target system would interface with a different, specialized operating system of a separate processor of the host system. The next closest prior art, Weber (US 5,812,668) discloses a system for the verification of the operation of a remote transaction clearance system where a merchant-controlled computer transmits test transactions to a test computer, and the test computer responds with simulated transaction responses including configuration data that the merchant-operated computer uses to configure itself. Newly cited art, Adachi (JP 60017539) discloses a system where an interface program is installed between the operating system of the native machine and the program of the target machine. Once emulation is started, the instructions issued in the target machine are converted to the instruction to the operating system of the native machine. The next newly closest prior art, Emulation Technology's press release, "EMULATION TECHNOLOGY INTRODUCES INDUSTRY'S FIRST PC-BASED INCIRCUIT "OPEN EMULATOR" SUPPORTING 8-,

16-, AND 32-BIT EMBEDDED MPU APPLICATIONS" discloses a system establishing new standards for ease-of development and flexibility in test environments by disclosing a multifunction, real-time, in-circuit emulator targeted for 8-, 16 and 32-bit applications.

However, Binkley, Weber, Adachi and the Emulation technology press release all fail to disclose the feature of providing an emulation module and an application both interfacing directly with an operating system of the development system. This distinct feature has been added to independent claims 1, 7, 8, 14 and 15 and renders them and all claims that depend from them (claims 2-6 and 9-13) allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
